Azure Rapid Deploy for Sage ERP

Start your ERP journey to the cloud on your own terms with the power and intelligence of enterprise-grade Azure infrastructure, today!

Whether you are kicking off a new ERP implementation, or you are looking to 'shift-and-lift' your current ERP deployment into the cloud, **Microsoft Azure** provides the perfect cloud platform for businesses of all sizes.

Business applications need to be accessible anytime, anywhere, and your ERP solution is no different. With many resources now working remotely coupled with the increasing costs and complexity of managing on-premise infrastructure, the question is not if your ERP should be in the cloud, but rather, *which cloud platform is right for my ERP requirements*.

Microsoft Azure puts hyperscale cloud computing power in the hands of your finance and IT divisions; giving you access to enterprise-grade technology, data security and the required scalability to match your budgetary requirements.

With your ERP managed in **Microsoft Azure**, you are future proofing your organisation and accelerating your journey for true digital transformation.

ERP on Azure

Main Features Include:

- Microsoft Azure SLA with 99.95% uptime guarantee
- Microsoft Azure datacenter of your choice – Now available in South Africa
- Shift hardware CAPEX to operational OPEX
- Up and running in 24 hours (depending on size and complexity)

Your Data Safe In The Cloud

Rationalise IT investments and reduce operating costs

- Easily move your on-premise ERP into Microsoft Azure within 24 hours.
- Get a global, hyper-scalable Azure infrastructure that saves you money.
- Enable world class security monitoring through pro-active activities.

Gain distinct business value through speed and flexibility to support new business initiatives

- Acquire and deploy virtual hardware within a few hours.
- Focus on key business objectives, rather than hardware issues.
- Enable fast and seamless backup and disaster recovery.

Enable rapid business transformation and intelligent operations

- Continue to use the Sage tools and applications you are already trained on, familiar with and use every day, to bring greater business efficiencies.
- Enable the discovery of new lines of business with IoT and it to help re-imagine and identify new business opportunities.
