

From Insight to Impact: AI, Edge Computing, Digital Energy, and the Future of Mining with 4Sight

An event where you can be engaged, educated and inspired on your AI journey.

INDUSTRY EXPERTS

- Tertius Zitzke
CEO
4Sight
- Wilhelm Swart
Chief Operational Technologies Officer
4Sight
- Vanessa Rufo
APM Engineer
4Sight
- Charl Marais
Digital Transformation BU Leader
4Sight
- JC Du Preez
Digital & Automation Operation Manager
Tharisa Minerals
- Christa Dowd
Digital Energy BU Manager
4Sight
- Mariana Sandin
Global Industry Principal
Seeq
- Harry Rosen
Managing Director
TAS Online

Event Invitation - 29 May 2025

Recognising Innovation. Driving Sustainability.

Join us for an exclusive industry event where we shine a spotlight on award-winning innovations shaping the future of mining. **From Insight to Impact with 4Sight** aim to bring together thought leaders, technology experts, and mining pioneers to explore how artificial intelligence, digital energy, prescriptive analytics, and edge computing are driving measurable sustainability outcomes across the sector.

AGENDA TOPICS

Tertius Zitzke
CEO
4Sight

From Hype to Impact: The Real Story of AI in Industry

Join Tertius Zitzke as he cuts through the noise to reveal how AI is truly transforming industry—from over hyped expectations to real-world impact of **Agentic AI** that leaders can't afford to ignore.

Wilhelm Swart
Chief Operational Technologies Officer
4Sight

Welcome to The New Edge:

Explore how Armada Edge Computing brings real-time intelligence to the frontline, enabling faster decisions, improved efficiency, and smarter asset management — right at the source of your data.

Charl Marais
Digital Transformation BU Leader
4Sight

Revolutionising Energy Sourcing with Prescriptive Energy

Discover how Prescriptive Energy leverages forecasting and real-time data to help energy-intensive industries optimise supply, cut costs, and slash CO₂ emissions — delivering a smarter, greener future for medium and large enterprises.

JC Du Preez
Digital & Automation Operation Manager
Tharisa Minerals

Sustainable Innovation: 4Sight OT Automation Leads the Way in Decarbonisation

A showcase on how 4Sight OT Automation, in partnership with Tharisa Mine, is delivering real-world decarbonisation results through digital energy solutions - saving approximately 2,000 kg of CO₂ emissions per hour and driving sustainability across the mining sector.

Vanessa Rufo
APM Engineer
4Sight

Unlock Peak Asset Performance with 4Sight Smart AI Reliability Information Assistant:

Join us to discover how the Reliability Information Assistant transforms asset management with predictive maintenance, smart decision support, and real-time data insights. Say goodbye to downtime and hello to proactive, AI-driven reliability!

Mariana Sandin
Global Industry Principal
Seeq

Advanced Analytics: The New Engine for Industrial Growth

Advanced analytics are inevitable. 4Sight Operational Technologies and Seeq transform real-time industrial data into actionable insights, boosting efficiency, enabling predictive maintenance, and empowering smarter decisions.

Harry Rosen
Managing Director
TAS Online

Maximise Pumping Performance with Smarter, Data-Driven Solutions

Discover how TAS Online's expert pump system assessments, real-time monitoring, and predictive maintenance strategies help mining and industrial operations achieve greater energy efficiency, reduced downtime, and sustainable deep-level pumping performance.
